

I-Cube provides **mobile license plate recognition** at affordable rates (R850 per month, excl. vat), allowing real time reaction to stolen or suspected vehicles.

A camera connected to a PC captures an image of the car and compares this license plate to a local database. This license plate is compared to suspected stolen vehicles, allowing proactive reaction to crime, stopping a crime before it occurs. The LPR system works automatically, generating an **alarm when a suspected vehicle is detected.**

License plate recognition can be linked to **weight, speed, colour, shape, time, access control or invoice.** Generation of revenue from the LPR system is certainly possible, with various marketing opportunities being created with the system.

Contact I-Cube for more details on 031 764 3077 082 562 8225 LPR@I-Cube.co.za

I-Cube provides **imaging solutions** which proactively reduce crime, prevent theft, and link an image to a transaction or invoice, allowing immediate response via SMS, E-Mail or audio / visual alarms.

Facial ID and verification solutions can be linked to an access card or pin or to a database of known criminals or important people, allowing PROACTIVE steps to be taken.

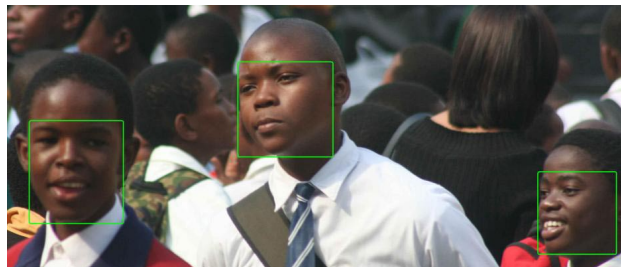

Image analysis allows colour, size, shape, intensity or texture to be used to identify any object, allowing the object to be accepted or rejected.
